

ProFoam Table Mat - Background Information

Challenges in conventional X-ray

Increasing **patient throughput**, **physical strain**, **complex techniques**, and lengthy **workflows** challenge radiographers.

Many patients are particularly difficult to examine due to **obesity**, **age**, or **injuries**.

Inferior **positioning aids** make efficient and precise work more difficult, carry a risk of **infection** and damage the **reputation** of the department.

Our Mission

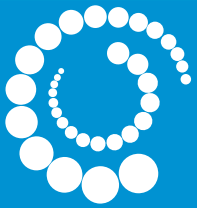

Pearl Technology positioning aids ...

... lead to **excellence** in imaging

... enable examinations **beyond the norm**

... are perfectly **adapted** to their working

environment

The Solution - ProFoam Table Mats

Custom-fit shapes in different designs enable simple and standardised applications.

The Solution - Advantages

A comprehensive range of positioning aids for the modern X-ray department

Well thought-out, ergonomic products enable even the most difficult examinations in the first attempt: from wrist scans to lateral hip projections.

Perfectly hygienic – Smooth, easy-to-disinfect surfaces and welded seams avoid contamination and unnecessary risks of infection. Wrapping sponges in linen or plastic becomes obsolete.

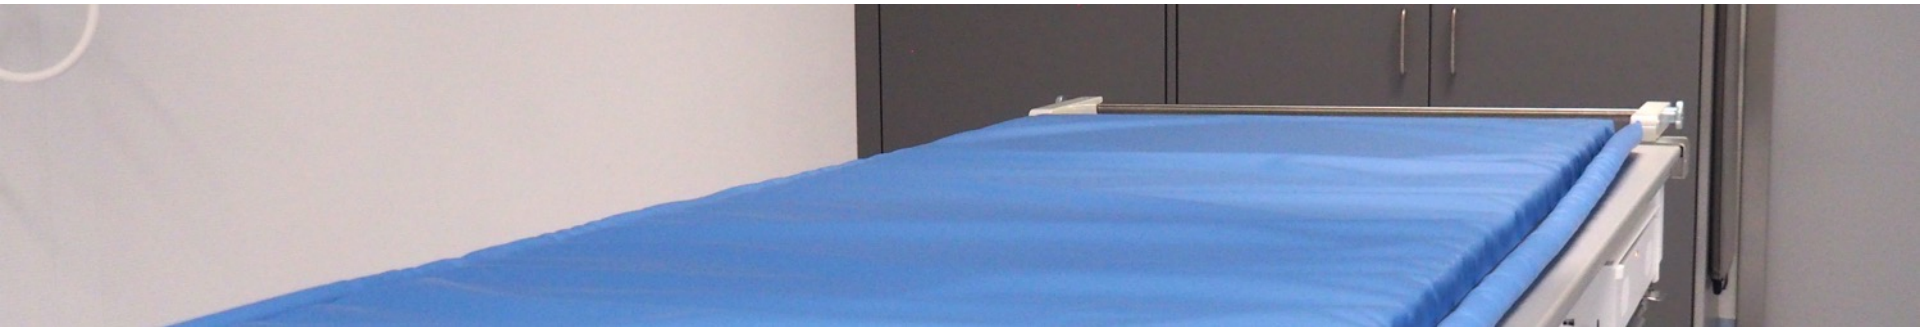

High durability – Even with intensive use, the products remain in shape with an intact surface.

ProFoam Table Mats – Available Versions

Article Nr.	Name	Properties
1199	ProFoam Table Mat 200x55x3 DS	Anti-slip, without handles
1201	ProFoam Table Mat 200x55x3 DSR	Slideable, without handles
1249	ProFoam Table Mat 200x60x3 DSRG	Slideable, with handles
1251	ProFoam Table Mat 200x70x3 DSRG	Slideable, with handles

ProFoam Table Mats – Slideable Version

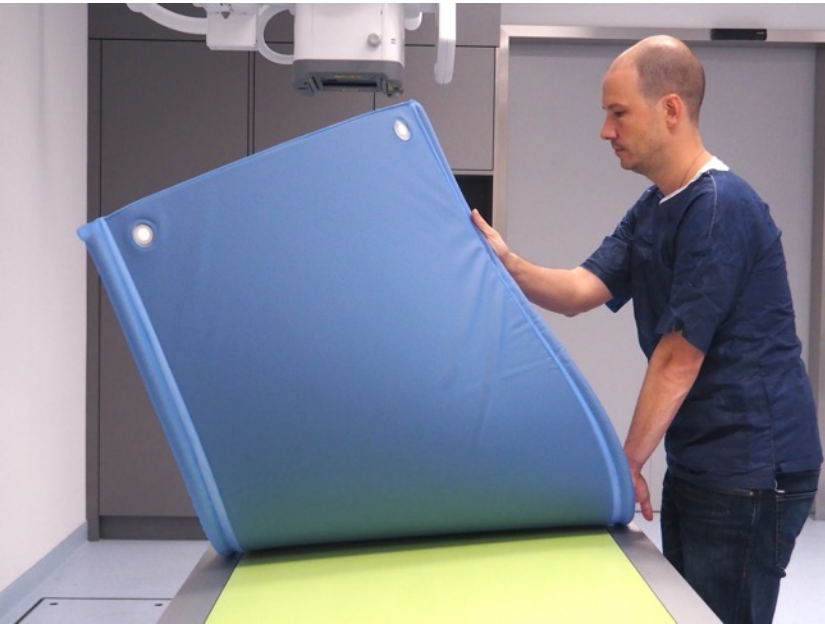

Easily move even heavy patients.
